# iRiver America Announces Next Generation MP3 CD Player

iMP-350 SlimX<sup>™</sup> is First Multi-CODEC and CD Player to Offer Upgradeable Firmware Through the Internet

SAN JOSE, Calif. – December 10, 2001 — iRiver America, the world's leading manufacturer of hybrid portable MP3 CD players, announced today the US introduction of iMP-350 SlimX", its top-of-the-line CD/WMA/ASF/MP3 player. As the world's slimmest multi-CODEC and CD player (16.7 mm), the SlimX supports MP3, WMA (Windows Media Audio), ASF, optional AAC (Advanced Audio Coding), multiple CD formats, holds up to 700 MB (over 250 songs) on a single CD, and upgradeable firmware consumers can download via the Internet.

"We are meeting the demands of increasingly sophisticated audio consumers," said John Kim, president of iRiver America. iRiver s award-winning engineers have unveiled SlimX, which harnesses the latest technology to deliver top quality sound using less storage space and download times. We are setting the new standard for MP3 players.

The worldwide consumer demand for portable CD players with MP3 capability has driven manufacturers to new levels of technology innovation and design. Global shipments of portable digital music player units are predicted to rise from 2.4 million in 2000 to over 9 million by 2005.

The company manufactures and distributes worldwide other popular models including the iMP-250\mathbb{m}, iMP-150\mathbb{m}, and iMP-100\mathbb{m}. Durability and advanced technology have made iRiver s products a standard for comparison in the CD/MP3 players, winning CNET s editor s choice award, and review praise from Amazon, dmusic.com, Smart Business Magazine, Edgereview, Besttoys, ePinions.com and Consumer Reports.

"The biggest appeal to consumers will be the features that SlimX provides, explained Jonathan Sasse, marketing director at iRiver America. It sports a streamlined profile that is 44% thinner than its counterparts, supports four different music formats, uses iRiver Shock-Free" compressed audio shock protection, multi-language support, and 23 hours of continuous play when using the rechargeable and 2 AA batteries in the external battery adapter. In addition, we will continuously grow with our consumer s needs by providing a convenient way for them to upgrade their systems through free downloads on iRiver America's website.

#### About iMP-350 SlimX

Designed for sophisticated consumers who place a premium on sound quality, ease of use, a slim 16.7 mm portable form factor, and multifunction MP3 CD player technology, iMP-350 s premium features include:
